## 1 General Information

### 1.1 About this product

The APS People Sensors are capable to record video files together with synchronous object tracking information, count results and configuration information. The APS Video Player is the PC tool to play back and visualize these data.

### 1.2 Tool Compatibility

The APS software will be continuously improved, and new features will be added. Thus, the video player needs to be extended sometimes as well. However, we strive to keep the program backwards compatible to videos recorded with every older firmware version.

Video Player	APS-M Firmware	APS-RS Firmware
1.18.0	all current versions (at least until 2.1)	all current versions (at least until 2.0)

## 2 Changes in this Release

Type	Description
fix	Object tracks were not displayed when recorded with firmware APS-M-1.11.3 or APS-M-2.1.0
fix	"Silent Install" did not work properly
fix	Videos could sometimes not be opened when located on a slow network drive. The player will now wait longer.

## 3 Known Issues, Restrictions and Notes

No.	Description
1	In APS-M videos the range overlay (red zone) may not be displayed correctly on sensors installed with a great pitch angle.

## 4 Reference Documents

Title	Date
