Hella Aglaia

PEOPLE SENSING

PS.PLATFORM

- NEW cloud-based IoT platform for straightforward, standardized access to all sensor data
- Configuration & Monitoring service tool includes **PS.Control** to manage **PS.C** sensors remotely
- Receives and stores data from **APS** and **PS.C** sensors
- Includes **PS.Statistics** to break down even the most complex data into clear representations and provides insights at a glance
- Data can be integrated via **PS.API** from the platform into third-party applications
- Data push to the cloud via HTTPS/SSL encryption

CONFIGURATION & MAINTENANCE

PS.STATISTICS
- Easy visualization and evaluation of the received data
- Quick insight into customer flow
- Comparison of different sensor locations

PS.API
- One access point to all sensors
- Easy-to-use Web API
- Pull data interface service
- Simple data link to your own Business Intelligence tool
- Encryption of data transmission via HTTPS

PS.CONTROL
- Cloud-based configuration and maintenance
- Remote configuration of the PS.C devices
- Monitor the status of all PS.C devices at all times
- Update all PS.C devices within seconds
