PLANNING

SENSOR
MANAGEMENT

DATA
MANAGEMENT

INSTALLATION PLANNING

• plan on-site installations online

• create 2D floor plan with sensor visualization

• order sensors for on-site installations

SENSOR MANAGEMENT

• configure sensors remotely

• update sensors remotely

• automated monitoring of connection status, data quality and health status of all devices

• receive automatic email notifications in case of malfunctions

DATA MANAGEMENT

• transfer and store sensor data in the cloud

• perform daily data backups

• export data manually through a web browser or automatically via API

• integrate data to third-party applications

USER & ROLE MANAGEMENT

• manage users, devices and data

• manage your and your customers devices and data

• set roles to manage access to sensors and data
